EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The specification has been amended to correct minor informalities, and to include the reference characters for parts of the invention that have been added to the drawings. In the specification, on page 5, line 26, the examiner has changed "and the like" to "or the like." And, on page 10, line 5, "15a_such that" has been changed to "15a such that." Also, on page 14, line 5, the reference character "46" has been changed to "45." The reference character "85" has been inserted in line 25 on page 10 after "first ignition means chamber." The reference character "86" has been inserted in line 27 on page 10 after "second ignition means chamber."

2. The following changes to the drawings have been approved by the examiner: reference characters 85 and 86 have been added to Figure 1 in reference to first and second ignition means chambers, and reference characters 12b and 13b have been added to Figure 1 according to the specification, see the attached marked up copy of Figure 1.

In order to avoid abandonment of the application, applicant must make these above drawing changes.

3. Claims 1-8 are allowed.

Art Unit: 3616

4. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose, teach, or suggest having a gas generator which have first and second igniters each with a first and second transfer charge in an ignition means chamber. Further the prior art fails to disclose, teach, or suggest having the direction of the flames from the igniters being not exactly opposite to the communication holes from the ignition means chambers to the combustion chambers. While the prior art discloses a gas generator that has two igniters in parallel, with concentric combustion chambers, and a transfer charge, there is no teaching for a gas generator having two transfer charges that are not exactly opposite the communication holes from the ignition means chambers to the combustion chambers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tiffany Webb whose telephone number is 571-272-2797. The examiner can normally be reached on 8-4:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on 571-272-6669. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
